

To Purify a Carpet Using Kurr Water - 28 /Sep/ 2019

Q: To purify a najis carpet or the like, is it enough to apply tap water — which is connected to the city water supply pipes — to a najis area; or should the used water be extracted as well?

A: After applying piped water, removal of the used water is not necessary; rather, after the inherently najis substance has been removed, water has reached the najis area, and the used water has been moved from this area by pressing with the hand while connected to piped water; the carpet becomes pure.
