

To Purify a Carpet Using Kurr Water - 28 /Sep/ 2019

Q: To purify a *najis* carpet or the like, is it enough to apply tap water — which is connected to the city water supply pipes — to a *najis* area; or should the used water be extracted as well?

A: After applying piped water, removal of the used water is not necessary; rather, after the inherently *najis* substance has been removed, water has reached the *najis* area, and the used water has been moved from this area by pressing with the hand while connected to piped water; the carpet becomes pure.
