

To Make Wudū' with a Dried Wound - 27 /Oct/ 2019

Q: Suppose, I injured my hand and later the blood dries. I do not know exactly what it is, whether a lump of dried blood, yellow pus or something else? Is it *najis*? Is it problematic to make *wudū'* with such a wound?

A: When a wound is going to heal, we find some yellow pus, etc. around the wound. In case, one is not sure that it is mixed with blood, it is not *najis* and there is no problem in making *wudū'*.
