

IR Leader inspects scientific fair - 5 /Aug/ 2008

Islamic Revolution Leader Ayatollah Sayyed Ali Khamenei inspected a fair dedicated to the latest scientific and technological achievements of the Iranian scientists and specialists in different sections.

Fifty-one projects by the Iranian scientists and specialists in the fields of nanotechnology, biotechnology, microelectronics, communications and information technology, new energies, stem cells, aerospace, medicinal herbs, Iranian medicine and nuclear sciences and techniques were on display in the fair in Imam Khomeini's Hosseiniyeh.

Some of these projects and innovations were conducted for the first time in the country with some of those technologies limited to a small number of countries.

At the end of the 3-hour visit, Ayatollah Khamenei underlined the necessity for facilitating the bureaucratic procedures of scientific researches.

Ayatollah Khamenei said that regarding the existence of enormous talents in the country, the scientific department of the executive should facilitate the bureaucratic procedures and expedite provision of aid to the researchers.

The IR Leader also stressed the necessity for due publicity works about any innovations in the field of science and technology and avoiding parallel moves in the field.

The fair was organized by the scientific and technological department of the Executive.
